

Macroscopic Solutions, LLC Tolland, CT www.macroscopicsolutions.com

Job Title: Imaging Technician

**Preferred Experience:** School of Digital Media & Design; w/ Dual Degree in College

of Liberal Arts and Sciences.

Job Function: Technical Operator; Fulfill Imaging Service Requests

**Employee Type:** Intern

**Start Date:** June 1st 2016

**Job Description:** The hired applicant will learn to use Macroscopic Solutions

technologies in order to fulfill image service requests.

A strong applicant must be able to demonstrate skills in quick, on-the-spot problem solving that are both effective and creative. This position requires some background in photography and/or scientific imaging and Photoshop. He/she must understand the imaging requests of the customer and be able to deliver an end product that meets their specific expectations.

The selected applicant must understand the unique market problem that Macroscopic Solutions is addressing. Therefore, the applicant must be able to effectively communicate why Macroscopic Solutions technologies and images are essential for the betterment of science, technology, engineering and mathematics (STEM).

## **Expertise**

- Advanced skills: The selected applicant will learn sophisticated skills in 3D modeling, stereo imaging, focus stacking and image rendering technologies and software programs.
- Potential: Selected applicant will be considered for full-time hire following the completion of this internship and may be taught additional skills related to customer acquisition.
- Hourly Rate & Commission: \$16 per hour and 3% commission incentive based on performance/profits.

Interested applicants should contact Macroscopic Solutions at info@macroscopicsolutions.com
