Inspiring Discovery

Macroscopic Solutions, LLC
Tolland, CT
www.macroscopicsolutions.com

Job Title: Web & Image Curator

Preferred Experience: Computer Science and Engineering Junior or Senior

Job Function: Curate Image Database & Website

Employee Type: Intern

Start Date: June 1st 2016

Job Description: The hired applicant will assist Macroscopic Solutions with the curation of content created by the company.

He/she must be able to manage and create web pages, which showcase the content created by Macroscopic Solutions. Content consists of high resolution images, 3D models, and other file types that are available for web commerce. He/she must have a strong understanding about social media and web networking.

The selected applicant will have the potential to grow in a role that can generate and contact new leads within STEM related fields that have expressed a clear need for Macroscopic Solutions imaging product line. This position requires intensive research about the needs of the customer, which will be regulated using cutting edge customer relations management software.

Training, Expertise & Salary

- The selected applicant will actively create new web pages for Macroscopic Solutions to host its rapidly growing image database.
- The selected applicant will learn the benefits of advertising via Social Media platforms.
- The selected applicant will contact and file claims to entities that have infringed on Macroscopic Solutions copyright guidelines.
- Product-to-Market: Selected applicant will learn how to apply specialized knowledge about sophisticated technologies in order to address a real-world market problem.
- Potential: Selected applicant will be considered for full-time hire following the completion of this internship.
- Hourly Rate & Commission: \$16 per hour and 3% commission incentive based on performance/profits.
